

## \* bet com

The outcome of virtual football bets is determined by a random number generator (RNG), which is a computer algorithm that generates a sequence of numbers that cannot be predicted in advance. The RNG is used to determine the outcome of each match, including whether a team will win, lose, or draw.

How does RNG determine or weight a team to win, loss, or draw in ... - Quora : How-does-RNG-determine-or-weight-a-team-to-win-los...&#246; How can I predict a virtual betting football sport? - Quora : How-can-I-predict-a-virtual-betting-football-sport

Virtual football is a computer-generated simulation that uses algorithms and a random number generator (RNG) to determine the results. This makes prediction based on skill or knowledge of the sport much less relevant.
