Electronic dance music (EDM) is a broad range of popular music styles that are characterized by a strong, steady bass line and a fast tempo. The music is often used in nightclubs and at music festivals. The genre has its roots in the 1970s and 1980s, but it has become increasingly popular in the 2000s and 2010s. The music is often produced using digital audio workstations (DAWs) and is characterized by its use of synthesizers, samplers, and digital effects.
