This article is about the continent. For other uses,

see Europe (disambiguation)

Europe is a continent[t] located entirely in the Northern Hemisphere an

d mostly in the Eastern Hemisphere. It is bordered by the Arctic Ocean to the no

rth, the Atlantic Ocean to the west, the Mediterranean Sea to the south, and Asi

a to the east. Europe shares the landmass of Eurasia with Asia, and of Afro-Eura

sia with both Asia and Africa.[10][11] Europe is commonly considered to be separ

ated from Asia by the watershed of the Ural Mountains, the Ural River, the Caspi

an Sea, the Greater Caucasus, the Black Sea, and the waterways of the Turkish st

raits.[12]

Europe covers about 10.18 million km² (3.93 million sq mi), or 2% of Ea

rth's surface (6.8% of land area), making it the second-smallest continent () Tj T* BT /

y sovereign states, of which Russia is the largest and most populous, spanning 3

9% of the continent and comprising 15% of its population. Europe had a total pop

ulation of about 745 million (about 10% of the world population) in 2024; the th

ird-largest after Asia and Africa.[2][3] The European climate is largely affecte

d by warm Atlantic currents that temper winters and summers on much of the conti

nent, even at latitudes along which the climate in Asia and North America is sev

ere. Further from the sea, seasonal differences are more noticeable than close t

o the coast.

European culture is the root of Western civilisation, which traces its

lineage back to ancient Greece and ancient Rome.[13][14] The fall of the Western
