like compound founder in the fruit of A plant that is a close relative with the tomato.  
The membrane is primarily composed of cellulose and pectin. The seeds are covered in a waxy coating called the seed coat.  
The chemical structure of cellulose is a long chain of glucose units linked by beta-1,4 glycosidic bonds.  
The chemical structure of pectin is a branched chain of galacturonic acid units linked by alpha-1,4 glycosidic bonds.

Although most people think that the hottest part of the chili is the seed, it is actually the membrane that is the hottest part.  
The white spongy layer is called the pith and is made of soft, spongy tissue.

Parents need to know that Hellraiser is a 2024 reboot of the Clive Barker horror movie franchise that started in the 1980s. Unsurprisingly, there's horror movie violence, gore, and blood. Victims of Pinhead and their minions get chained up by their wrists and ankles, get meat hooks stabbed into their shoulders & amp; get their faces crushed.
