Apple monitors for new malware infections and strains, and updates signatures automatically independent from system updates to help defend a Mac from malware infections.

Protecting against malware in macOS - Apple Support : guide : security : web

What's interesting is that there are no virus scanners for iPhones. But why is that and why is there no antivirus software for iOS? We've looked into this and will explain why in this post and why Apple doesn't even allow antivirus apps for iOS.

Virus protection for iPhones : Why is there no antivirus for iOS? | Avira : blog : why-arent-there-virus-scanners-for-iphones : avira : why-arent-there-virus-scanners-for-iphones
