Solar flares are powerful bursts of energy known to impact electric power grids, navigation signals, radio communications and can pose risks to spacecraft and astronauts.

Watch: Sun emits strongest solar flare in years - BBC

Intense currents driven by space weather can have severe impacts, damaging or destroying critical infrastructure, interrupting the internet and other communications and leading to power outages. The federal government is already making plans to prepare for and respond to the next big solar storm.

Preparing for Power Outages in the Face of Solar Storms

On your telephone and wait for confirmation before hangout. Now you can dial to unblock withheld numbers (private caller) BT/F1
