Burchell's zebra live in herds of permanent members.

In contrast, Grevy's zebra groupings fluctuate, and associations within the group last only a few months.

During the breeding season, males will become highly territorial, guarding boundaries of large swaths of land to keep herds within them.

During the breeding season, males will become highly territorial, guarding boundaries of large swaths of land to keep herds within them.

During the breeding season, males will become highly territorial, guarding boundaries of large swaths of land to keep herds within them.
