<p>From Flash to HTML5 available without Poki games</p>

<p>Since people have always enjoyed unwinding and &#128183; having fun, they have created numerous devices or simply exploited resources that were available to them. That is how things &#128183; familiar to us were created: balls, skittles before that they were just stones and sticks. But now we have &#128183; all these technology and devices, thanks to which the gaming component of everyday life has increased many times.</p>

<p>Since modern browsers &#128183; have stopped supporting Flash technology since 2024, games based on this system are gradually leaving web pages. However, there are &#128183; still some of the most popular toys that work in browsers using special emulators. HTML5 technology significantly expands the possibilities &#128183; for players. Created using modern developments, HTML5 games can be launched both on desktops and on many other devices of &#128183; various modifications.</p>
