<div class="hwc kCrYT" style="padding-bottom:12px;padding-top:Opx"><div><div><div><div><div><div></div>

The linear range can be measured simply by making a plot of analyte concentration versus fluorescence, using evenly-spaced analyte concentrations, and seeing at what concentration the data deviate from a straight line that is tangent to the low end of the concentration range.</div></div></div></div></div>
