

O O bet365

ite the difference! So why does a minecraft day go by so much faster than a real life? It's not just the difference in time, but the way time is perceived. In a game, you have control over your environment, and you can move at a much faster pace than in real life. This is why many people find it so relaxing and enjoyable to play Minecraft. It's a world where you can build, explore, and survive at your own pace. The game's day-night cycle is much shorter than in real life, which makes it easier to manage your resources and plan your activities. So, why does a minecraft day go by so much faster than a real life? It's because in the game, you have control over your environment and can move at a much faster pace than in real life.
